# Bathroom FOCUS

*This award-winning design proves you can combine a bathroom and laundry in one beautiful space with Corian.*

## THE BRIEF

The brief given to expert kitchen and bathroom designer Celia Visser for her clients' city townhouse was clear: a combined bathroom and laundry that was innovative, aesthetically minimalist and sophisticated. They also wanted to have a blissful soak after a hard day at work, good storage and practicality of the service areas.

## CHALLENGES

The two major challenges were size constraints and incorporating a utility room and luxe bathroom in one. Visser brilliantly resolved the soaking challenge by including an exterior spa bath which is accessed directly through a glass door from the shower area.

## THE INTEGRATED LAUNDRY

Appliances are hidden inside the single vertical unit. The striking horizontal lines of the bespoke Corian vanity in Corian Designer White – with its seamlessly formed Corian basin, Corian door fronts and electric cabinetry are enhanced by elongated mirrored cabinets holding generous amounts of storage. Corian Designer White is a very clean 'black' white – perfect for this streamlined space.

## FABRICATION

The Corian vanity top and door fronts were fabricated and installed by experts from Topline Benches – a favourite with designers due to the absolute care they take to deliver a great outcome.

## THE BATHROOM DESIGNER

Designer: Celia Visser for Celia Visser Design, with Corian from Evolution of Surfaces. Elegant in its simplicity, this versatile room exceeded the clients' expectations, and won Visser a National Kitchen and Bathroom Association Design Award.
